Security+

Security+ Certification, sponsored by CompTIA (Computing Technology Industry Association), is a test for security knowledge mastery of an individual with two years on-the-job networking experience, with emphasis on security. The exam covers industry wide topics including communication security, infrastructure security, cryptography, access control, authentication, external attack and operational and organization security.

Security+ is being used as an elective or prerequisite to advanced vendor specific and vendor neutral security certifications. The demand for skilled security professionals is growing significantly. The technology community identifies Security+ as the perfect way to validate your knowledge of information security.

Course Highlights

Following topics will be covered in this course.

- General Security Concepts
- Communication Security
- Infrastructure Security
- Basics of Cryptography
- Operational/Organizational Security

Duration

This course consists of 36 hours of instructor led and hands-on classes.

Certification Requirement

Security+ Certification requires passing CompTIA's Security+ exam: SY0-101. This exam can be taken at Prometric or VUE Testing Center.

Job Prospectus
