Sign up now. Capacity is limited.
Classes are geared for adults and teens.
- **CONVENIENT TO METRO**
We are walking distance (2+ blocks) from East Falls Church Metro (orange line).

BUILD-IT-YOURSELF IS A GREAT WAY TO UNDERSTAND YOUR COMPUTER

"I Built the Computer I'm Typing On."
Does this seem like a very difficult prospect? It's not. If you would like to know how to build and set up a computer, you can learn this, and more, in a 13-hour course at the Global Computer Training Center.
In this course, you will learn what the parts of a computer are, how they work together, how to put them together, and how to set them up and make them run. You will finish with a knowledge of

computers that you probably now think is impossible. You will never be intimidated by computers again. When you complete the course, you will have a perfectly functioning computer that will be ideally suited to the uses you want. Tuition will be \$758. For everything! Want to think it over? The introductory meeting is FREE. More information and registration details are available at our web site.
